Abstract

In my 2020 book *Deep Reality*, I described the bit-physics infrastructure of the universe as a hyperdimensional infinite bit-plane that represents the source of the multiverse and our mind as well.

This conversation will proceed in a non-technical manner about the hyperdimensional nature of Source Science and what it means for humans and our understanding of the multiverse. Hold on to your hat, since this conversation will go where we might not expect.

Definition of Source Science Foundations

1. Information is Physical (not just mathematical)
 - John Wheeler: “It from Bit” since a bit is smallest change to a black hole
 - Rolf Landauer: Erasing information loses energy (1961 and measured in 2012)
 - Bits are physical and have an effective energy and therefore an equivalent mass
2. Reality is Hyperdimensional (not 3 space + 1 time dimensions)
 - Bits, qubits and ebits are very real with essential novel behaviors
 - Bit is one dimensional and is used to make qubits and ebits
 - Qubit is quantum primitive for superposition with 2 private bit dimensions
 - Ebit is quantum primitive for entanglement with 4 private bit dimensions
 - Shor’s algorithm uses 2^{1000} states to compute faster than any classical computers
3. Thoughts are quantum things-not in the brain (Descartes assumption is false)
 - Thoughts are “information things” and intentions affect the physical world.
 - Thoughts can “directly” affect REG PK devices in the physical world (even brain)
 - Solution required to show how non-physical mind can influence order/disorder

These behaviors are the hard problem of real intelligence (skeptics ignore)

Mind is a hyperspace Instrument

Mind remotely accessing information

- Knowing a subject without traditional learning (science/math/art)
- Direct intuition/dreams/knowing about new technology/inventions
- Direct download of mathematical understanding
- Direct awareness of EM/power flow in circuits
- Direct awareness of energy wells on semiconductors
- Direct awareness of quark-like states in atoms (anu)
- Direct awareness of biofields around living things/plants/people
- Direct knowing of nature, plants, animals, other's thoughts
- Influencing Quantum states (shielded double-slit experiment)
- Remote viewing in non-local distances in space
- Remote viewing in non-local distances in time - presentience
- Savants and infinite intelligence
- Tapping into source of all knowledge – Akashic Records

All this requires a non-classical hyperdimensionality model of science/mind

Meaning is Hyperdimensional

- Meaning is required for:
 - Understanding concepts
 - Designing experiments
 - Building components and equipment
 - Interpreting results
 - Defining potential inconsistencies in theory/practice
 - Education by communicating and learning
 - Meaning starts in mind and projected upon our environment
- Real Intelligence, beyond information and spacetime
 - AI has failed in general learning machines (no meaning)
 - Hyperdimensional math give properties not possible in 3D math
 - RI, Savants and infinite intelligence are beyond classical AI
 - An actual hyperdimensional space is beyond any 3D simulation
 - Hyperdimensions does not compress into 2D holograms
 - Spacelike connections makes connectivity local (entanglement)
