About Doug Matzke

o My moniker is Quantum Doug

o Programming for over 55 years, IEEE Life Member

o Chairman of PhysComp '92 and PhysComp '94

- ANPA Session in PC'94

o Written over 40 papers/talks and 10 patents

- Will Physical Scalability Sabotage Perf. Gains?

o PhD in Quantum Computing in 2002 at UT Dallas

- Quantum Computing using Geometric Algebra

- Built GALG symbolic math tool in python

- GALG research for last 20 years (w/Mike Manthey)

o Awarded $1 million SBIR grants on topics:

- Neural and quantum computing

o Certified master practitioner in Neuro-Linguistics-Programming (NLP)

o Source Science and bit-physics

- Deep Reality coauthor **William A. Tiller (deceased)**

- Co-Founder of company www.CoherentSpaces.life
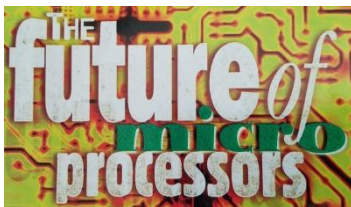

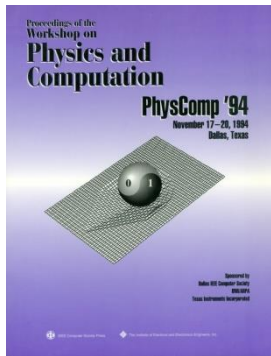

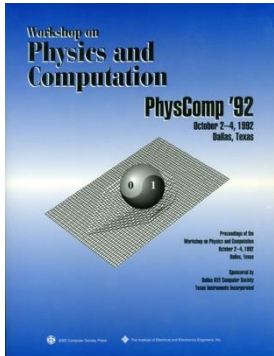

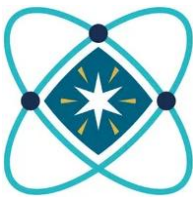

Abstract

Can you imagine what it was like to be a budding scientist before electricity/magnetism concepts, components and equipment were common place? That same kind of frontier engineering is happening in my mixture of quantum computing and AI development.

I will discuss what is happening right now in the development process to support my label of Source Science technology. This talk describes facets of the technology that is similar to and different from convention classical engineering, and how intuition plays into this work.

I will use examples of Source Science based on my recent work developing the WISH unit (World Integrity Space Harmonizer) with the primary inventor. I have started a company www.CoherentSpaces.life based on this product development and deployment. Be sure to join this meeting for the cutting edge of deep frontier development and challenge your outdated classical world view.

Definition of Source Science Foundations
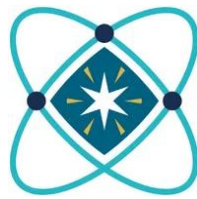

1. Information is Physical (not just mathematical)
   - John Wheeler: "It from Bit" since a bit is smallest change to a black hole
   - Rolf Landauer: Erasing information loses energy (1961 and measured in 2012)
   - Bits are physical and have an effective energy and therefore an equivalent mass

2. Reality is Hyperdimensional (not 3 space + 1 time dimensions)
   - Bits, qubits and ebits are very real with essential novel behaviors
   - Bit is one dimensional and is used to make qubits and ebits
   - Qubit is quantum primitive for superposition with 2 private bit dimensions
   - Ebit is quantum primitive for entanglement with 4 private bit dimensions
   - Shor's algorithm uses 2^{1000} states to compute faster than any classical computers

3. Thoughts are quantum things-not in the brain (Descartes assumption is false)
   - Thoughts are "information things" and intentions affect the physical world.
   - Thoughts can "directly" affect REG PK devices in the physical world (even brain)
   - Solution required to show how non-physical mind can influence order/disorder

> *"Quantum mechanics is the dreams that stuff is made of "*
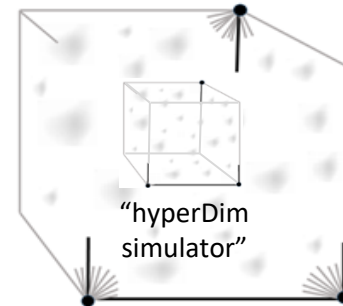

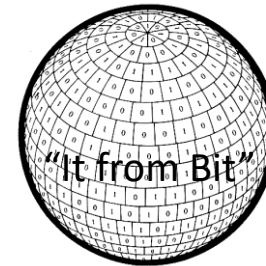

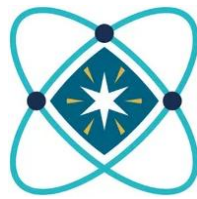

Source is Quantum Simulator
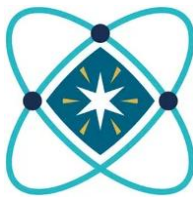

Richard Feynman

"Nature isn't classical, dammit, and if you want to make a simulation of nature, you'd better make it quantum mechanical, and by golly it's a wonderful problem, because it doesn't look so easy."

"It from Bit"

"hyperDim simulator"

Quantum infrastructure is required to efficiently simulate a quantum universe

Meaning is Essential to Science

- Meaning is required for:
  - Understanding concepts
  - Designing experiments
  - Building components and equipment
  - Interpreting results
  - Defining potential inconsistencies in theory/practice
  - Education by communicating and learning
  - Meaning starts in mind and projected upon our environment
- Real Intelligence, beyond information and spacetime
  - AI has failed in general learning machines (no meaning)
  - Hyperdimensional math give properties not possible in 3D math
  - RI, Savants and infinite intelligence are beyond classical AI
  - An actual hyperdimensional space is beyond simulation
  - Spacelike connections makes connectivity fast (entanglement)

Content Addressable Memory Math

- Pick a random point P in a 3 dimensional space – easy

- Pick a random point P in a 100 dimensional space – hard

- Pick 2nd point Q in a each space – compute distance

- Pick many points X in a each space – compute distances

- Find the distances have an average value and std deviation
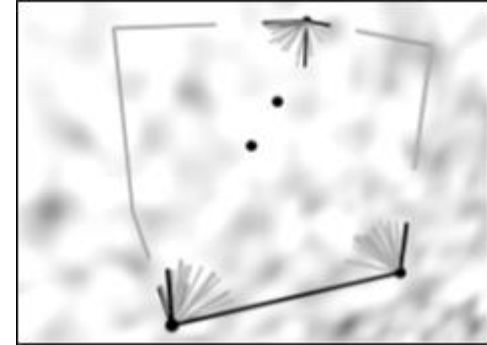

Correlithms for dimensions N>20 and midpoint M: (unit cube)

- Euclidean Distance PQ is $\sqrt{N/6}$ (standard distance)

- Standard dev of PQ is $\sqrt{7/120}$ (independent of N)

- Distance MP or MQ is $\sqrt{N/12}$ (standard radius) & $\sqrt{1/60}$

- For big N standard distance/radius are constants
  - Intrinsic normalization measure (similar to light year)

- Correlithms known as CAM/sparse distributed coding
  - related to cell phone CDMA and spread spectrum
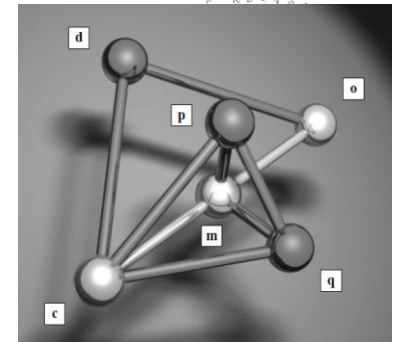

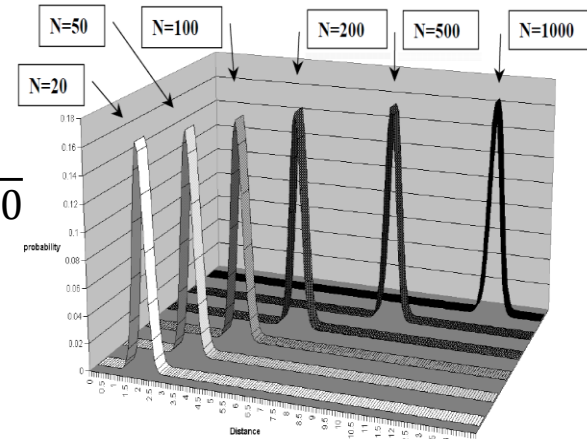

Mathematics for **Law of Attraction** meaning:
the data (bits) are the address
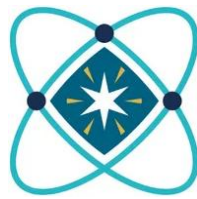

Mind is the ultimate Instrument

## Mind remotely accessing information

- Knowing a subject without traditional learning (science/art)
- Direct intuition/dreams/knowing about new technology/inventions
- Direct download of mathematical understanding
- Direct awareness of EM/power flow in circuits
- Direct awareness of energy wells on semiconductors
- Direct awareness of quark-like states in atoms (anu)
- Direct awareness of biofields around living things/plants/people
- Direct knowing of nature, plants, animals, other's thoughts
- Influencing Quantum states (shielded double-slit experiment)
- Remote viewing in non-local distances in space
- Remote viewing in non-local distances in time - presentience
- Savants and infinite intelligence
- Tapping into source of all knowledge – Akashic Records

All this requires a non-classical hyperdimensionality model of science/mind

# Power propagates on wires w/EM fields
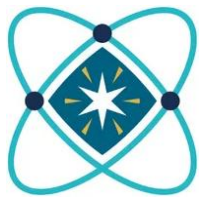

See Veritasium on YouTube: How Electricity Actually Works
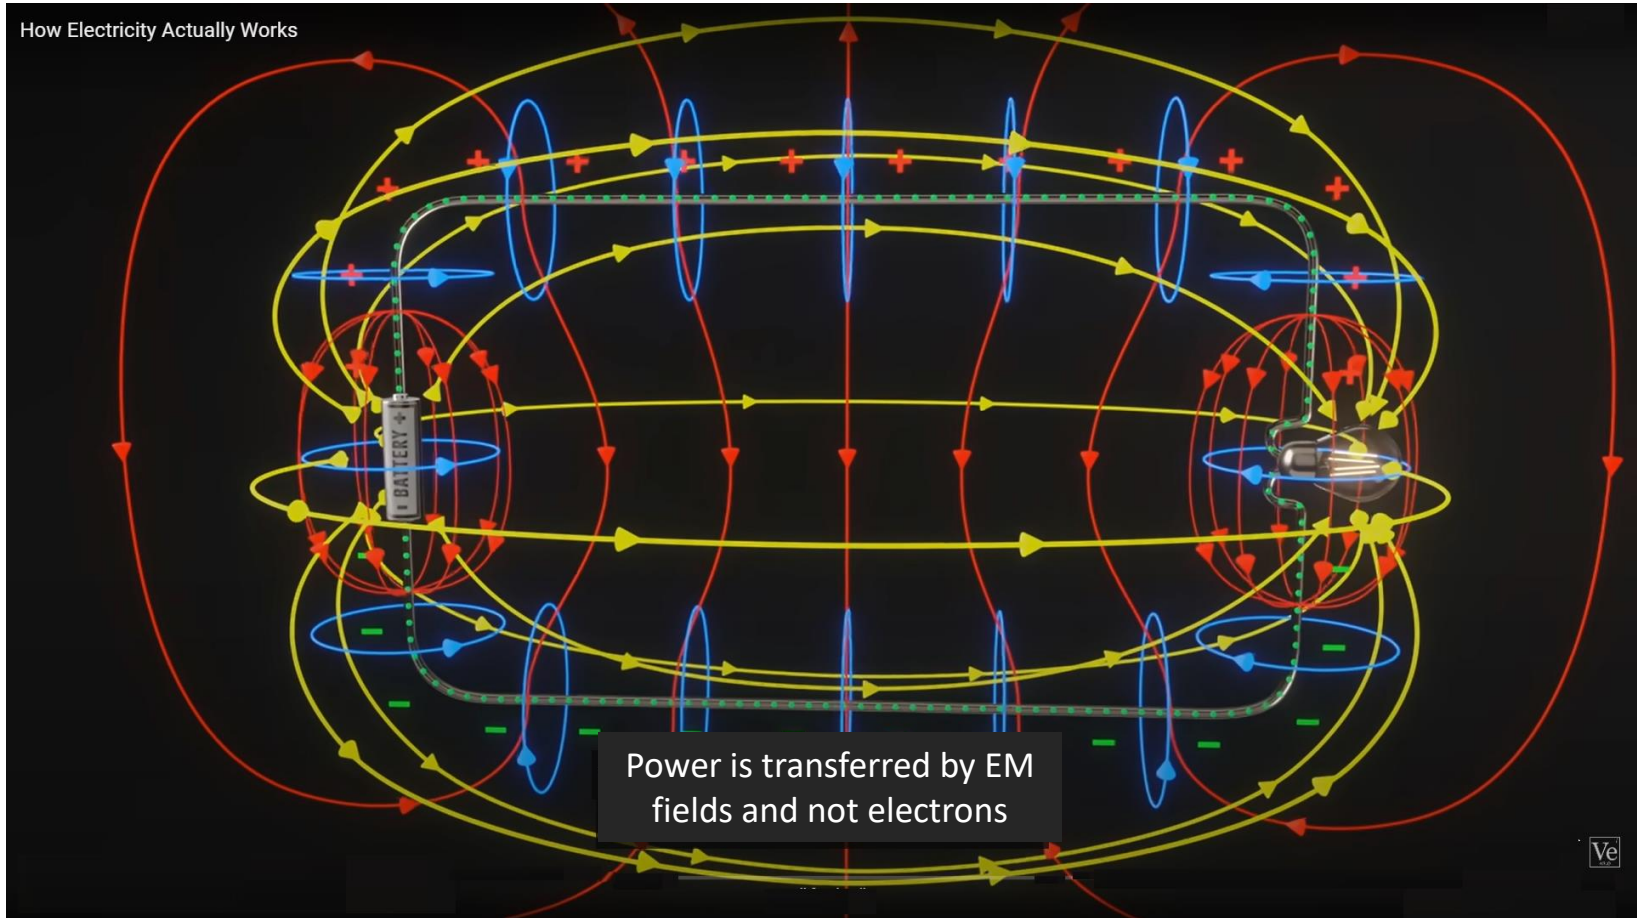

Our models and instruments limits how we view the world.
It is possible to directly experience this power flow? YES!
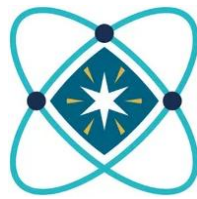

Awareness of Chakras and Anu

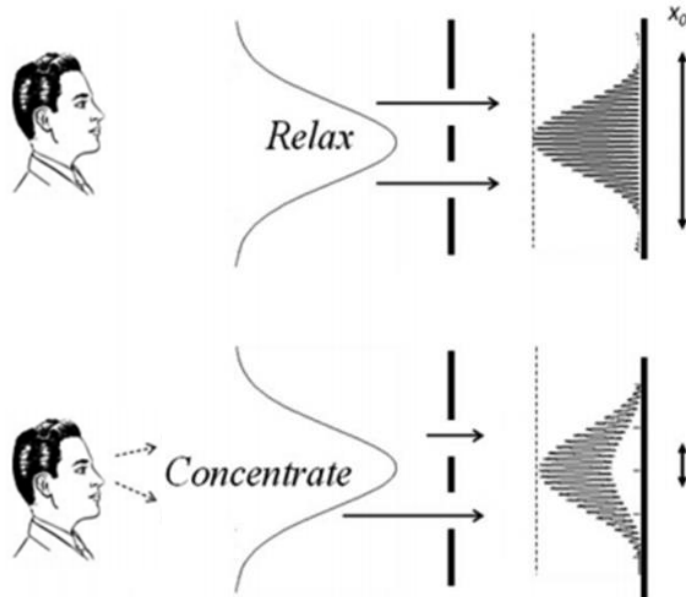

MALE.   FEMALE.

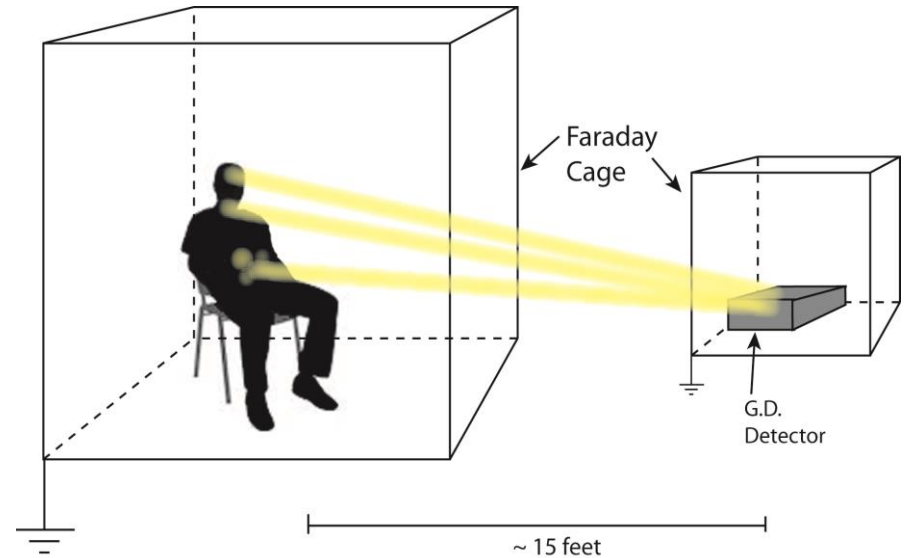

Start Three Boxes Experiment ⟹

Intention affects Quantum States

Significant numbers of REG and PK experiments, and these stand out

Dean Radin double-slit PK

William A. Tiller gas-discharge PK

- Shielded double-slit with photo detector
- Direct influence of quantum interference
- Worked online using remote volunteers
- Shielded gas-discharge near threshold
- Shielded volunteer from device
- Direct influence of avalanche rate (tunneling)
- Aka chords observed from three chakras

Significant: since **no** electromagnetic effects would be possible

Temporal Window key to Transcendence

Wavelength determines Size of 'Now' Bubble

Higher Frequency and more sequential

Sequential focus

energy

Concurrent focus

Longer wavelength leads to more unity

Wavelength:
$$v = 1/f = time/cycles$$

Slowing thoughts – step out of spacetime - **Transcendence**

coherent spaces

# WISH- World Integrity Space Harmonizer Demo

- Turn ON the WISH unit. Energized Logo
- Unique since designed with electrical and source science awareness
- Quantum Resonance make spaces more coherent and more orderly.
- Negative thoughts/emotions disappear
- Communication device supports higher self and intuition. New best friend!
- Personal/professional markets are: Autistic kids, massage clinics, yoga studios, therapists, elderly care, homes, offices.
- Examples of results
- ❖ Not a medical device nor medical claims

Einstein: "There are only two ways to live your life. One is as though nothing is a miracle. The other is as though everything is a miracle."

Source Science Results
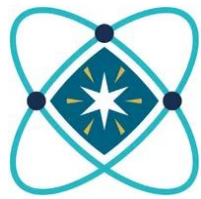

- Pre-quantum, proto-bit, spacelike reality

- Testable predictions about mind & quantum physics
- Reveal the three boxes: The mind is not classical!!

- WISH Unit feedback
 - Describe any sensations, emotions, thoughts, …
